

I am convinced that the FCC in an attempt to find sources for Money have not carefully looked at the consequences of their potential actions wrt: BPL on the Amateur Service's ability to be first responders in the event of major catastrophies like the Northridge Quake and Wild Fires to name 2. You have not asked FEMA or the Long Haul Aircraft communication impacts of this potential change. Please take these matters into account prior to a rulemaking that could have terrible consequences to our ability to help in the event of a major disaster.
